DIV. OF OIL, GAS & MINING

STATE OF UTAH DEPARTMENT OF NATURAL RESOURCES DIVISION OF OIL, GAS AND MINING

1594 West North Temple Suite 1210
Box 145801
Salt Lake City, Utah 84114-5801
Telephone: (801) 538-5291 Fax: (801) 359-3940

NOTICE OF INTENTION TO COMMENCE SMALL MINING OPERATIONS

The information requirements of this form are based on provisions of the Mined Land Reclamation Act, Title 40-8, Utah Code Annotated 1987, and the General Rules as promulgated under the Utah Minerals Regulatory Program (R647). The rules and Act are available online at http://www.rules.utah.gov/publicat/code/r647/r647.htm and http://le.utah.gov/~code/TITLE40/40_08.htm.

Cultural Resources Survey: To fulfill its obligations under Utah Code Annotated 9-8-404, the Division needs cultural resource (archaeology) information. The amount and type of information required will depend on the mine location, the history of previous disturbance, and other factors. Please contact the Division for further information.

A permit fee of \$150 must accompany this application (Utah Code Ann. §40-8-7(1)(i)) and is due annually.

"Small Mining Operations" are operations which have a disturbed area of ten or fewer surface acres at any time in unincorporated areas, or five acres or fewer in incorporated areas.

I. GENERAL INFORMATION (Rule R647-3-104)

1.	Name of Mine: Trace Mine 1 – Aumco Claim (M039/002)					
2.A.	Name of Entity Applying for a Permit: AZOMITE Mineral Products, Inc.					
	Contact (Authorized Officer): James D. Phillips					
	Mailing Address: P.O. Box 21					
	City, State, Zip: Nephi, Utah, 84648					
	Phone: 435-623-8007 Fax: 435-623-8009					
	E-mail Address: jim@azomite.com					
	Entity is a: (_x_) Corporation, () LLC, () Sole Proprietorship (dba), () Individual, () Partnership (General, orlimited), () Other (specify type)					
2.B.	Business Entity (not individuals) must be registered (and maintain registration) with the State of Utah, Division of Corporations (DOC) If not currently registered, contact www.commerce.utah.gov to renew or apply. Are you currently registered to do business in the State of Utah? (_x_) Yes () No Business Entity #: 7183569-0143					
	Local Business License #: (if required)					
	Issued by: County: or City:					
	Registered Utah Agent (as identified with the Utah DOC) (if individual leave blank): Name: James D. Phillips Title: President Address: P.O. Box 21 City, State, Zip: Nephi, Utah, 84648 Phone: 435-623-8007 Fax: 435-623-8009					
	E-mail Address: jim@azomite.com					

2.C. Entity's Representative(s) (if different from #2A) authorized and designated to receive notices of violation, cessation orders, and all other notices to be given to the permittee or operator by the Division. _____ Title: Address: City, State, Zip: Fax: Phone: E-mail Address: Name: _____ Title: Address: _____ City, State, Zip: Phone: _____ Fax: ____ Emergency, Weekend, or Holiday Phone: E-mail Address: If Business is a Sole Proprietor (dba) or Individual: 3. 2.	Is the project within an incorporated area? () Yes (_X) No RECEIVED
3.	If yes, what is the town or city?
0.	landmarks and operations details. All maps must include a north arrow, scale, appropriate labels and title box including the mine name, township, range and section.
	a. The <u>general location map</u> must be the scale of a USGS 7.5 minute series map or equivalent (1"=2000') and identify new or existing access roads.
	b. The operations map (1"=200' or other scale as determined necessary by the Division) must be labeled and identify:
	 i. The area to be disturbed; ii. The location of any existing or proposed operations including access roads, drill holes, trenches, pits, shafts, cuts, or other planned activities; and iii. Any adjacent previous disturbance for which the operator is not responsible.
	(Contact the Division for a list of consultants and land surveyors for mapping assistance.)
4.	The proposed (10 acre or less) disturbed area (including access/haul roads) should be marked ON THE GROUND with metal T-Posts (or with some other marker of equal effectiveness). Markers should be appropriately spaced so that the next marker in either direction is clearly visible with the naked eye.
l.	OPERATION PLAN (Rule R647-3-106)
1.	Type of mining: Surface (X) Underground ()
2.	Mineral(s) to be mined: Volcanic Ash – trade name AZOMITE®
3.	Amount of material to be extracted, moved, or proposed to be moved:
0.	To be determined by consumer demand. Estimate 30,000-40,000 tons/year.
	To be determined by consumer demand. Estimate 30,000-40,000 tons/year.
4.	Will any water, liquid chemicals, reagents, or other solutions be used, produced or discharged as part of the mining or milling process? Yes () No (_x) If yes, please describe (add extra pages if needed):
5.	Provide a brief description of the proposed mining operation, and onsite processing facilities (add extra pages if necessary). See Exhibit A
6.	(<u>N/A</u>) New Road(s): Length(ft), Width(ft)
7.	(<u>N/A</u>) Improved Road(s): Describe improvements that need to be made to existing roads to access the site, including the Length (ft) and Width (ft) of new disturbances.
8. 9.	Total project surface acreage to be disturbed: 9.45 (acres) PLEASE SPECIFY EXACT ACREAGE (this will be used to determine surety bond amount – see #VI). Proposed startup date (month, year): On-going
10.	Proposed completion, if known (month, year): On-going

IV. OPERATION AND RECLAMATION PRACTICES (Rule R647-3-107, 108 & 109)

DEC 3 1 2014

The reclamation and operation obligation is to keep the area clean and safe, minimize hazards to public safety, return the land to a useful condition, and reestablish at least 70 percent of the premining vegetative ground cover or within practical limits. To accomplish this, the Permittee / Operator will need to perform reclamation concurrently, or at the completion (within one (1) year) of mining. Please refer to The Practical Guide to Reclamation in Utah, available at:: https://fs.ogm.utah.gov/pub/MINES/Coal Related/RecMan/Reclamation Manual.pdf.

- 1. Keep the mining operation in a safe, clean, and environmentally stable condition.
- 2. Permanently seal all shafts and tunnels to prevent unauthorized or accidental entry.
- 3. Plug drill holes with a five foot cement surface plug. Holes that encounter fluids are to be plugged in the subsurface to prevent aquifer contamination.
- 4. Construct berms, fences, or barriers, when needed, above highwalls and excavations.
- 5. Remove, isolate, or neutralize all toxic materials in a manner compatible with federal and state regulations.
- 6. Remove all waste or debris from stream channels.
- 7. Dispose of any trash, scrap metal, wood, machinery, and buildings.
- 8. Conduct mining activities so as to minimize erosion and control sediment.
- 9. Reclaim all roads that are not part of a permanent transportation system.
- 10. Stockpile topsoil and suitable overburden prior to mining.
- 11. Stabilize highwalls by backfilling or rounding to 45 degrees or less, where feasible; reshape the land to near its original contour, and redistribute the topsoil and suitable overburden.
- 12. Properly prepare seedbed to a depth of six inches by pocking, ripping, discing, or harrowing. Leave the surface rough.
- 13. Reseed disturbed areas with adaptable species. (The Division recommends a mixture of species of grass, forb, and browse seed, and will provide a specific species list if requested.)
- Plant the seed with a rangeland or farm drill, or broadcast the seed. Fall is the preferred time to seed.

V. VARIANCE REQUEST (Rule R647-3-110)

RECEIVED

Any variance must be approved writing in advance by the Division

Any planned deviations from Rules R647-3-107, Operation Practices, R647-3-108, Hole Plugging Requirements, or R647-3-109, Reclamation Practices, as summarized above (see IV. Operation and Reclamation Practices Item # 1-14), should be identified below listing applicable fully form the Cive justification for the variance(s) and alternate methods or measures to be utilized to meet the intent of the rule. Written approval from the Division will be given, if the proposed alternative methods to be used are consistent with the Act.

Are variances being requested? Yes () No (_X)						
Variance Red	quested					
Item # Justification:	Applicable Rule					
Alternate me	thods or measure to be utilized:					

Attach additional page(s) if more variances are requested.

VI. SURETY (Utah Code Ann. §40-8-7(1)[c])

A reclamation contract and surety must be provided to and approved by the Division prior to commencement of operations. No surface disturbance is authorized until the surety is posted and approved in writing. The surety may be provided in the form of a certificate of deposit, a letter of credit, a surety bond, or cash. Please contact the Division for further information about submitting the surety. All mining operations are required to furnish and maintain reclamation surety to guarantee that the land affected is reclaimed (Utah Code Ann. §40-8-7(1)[c]).

The reclamation surety amount is based on the nature, extent and duration of operations. The amounts are based on data from current large mine surety and are used as a general guide, along with actual site conditions. Reclamation surety for small mines is reviewed every three (3) or five (5) years and adjusted as necessary for inflation/deflation based upon acceptable Costs Index. Contact the Division for the dollar amount required for a three (3) or five (5) year period for this project.

VII. SIGNATURE REQUIREMENT

CERTIFICATION

I state under penalty of perjury under the laws of the state of Utah and the United States of America that:

- a. I have read this form and declare the information, statements and/or documentation are true, correct and complete to the best of my knowledge and belief; AND
- b. I commit to the reclamation of the aforementioned small mining project as required by the Utah Mined Land Reclamation Act (40-8) and the rules as specified by the Board of Oil, Gas and Mining.
- c. **This certification must be signed by:** (1.) an executive officer if the applicant is a corporation; (2.) a partner if applicant is a partnership (general or limited); (3.) the owner if applicant is a sole proprietorship; **or** (4.) the member or manager if applicant is a limited liability company.

Signature: James 1	D. Phillips	Date: 12/31/14

DIV. OF OIL, GAS & MINING

Brief Description of Mining and Reclamation Plan

Mining of the Ore will be done on a periodic basis driven by end consumer demand. It is anticipated stockpiling of material will occur on site to make the mining economically desirable. The basic mining plan consists of four phases: (1) Loosen the mineral deposit by one of two common methods - a) "rip" the ore with a large crawler or b) "drill and shoot" the deposit. The drill and shoot program has some variability to the size and frequency. This work will be completed by a sub-contractor. Where "ripping" did not produce satisfactory results, work on the <1:1 slope that is ready to reseed was done with a combination of small shots to loosen material and heavy equipment, Shots in the stepped wall area will be larger. We anticipate targeting blasts of >30,000 tons. Frequency of all blasts will be determined by product demand. 2014 demand was approximately 33,000 tons. We forecast increased growth in the future. All blasting should be scheduled to minimize exposure to visitors to the Yuba State Park. The road will be temporarily closed by the sub-contractor during the actual blasting. (2) Reduce the loosened ore to an appropriate size (maximum of 18") rock but typical processing may be <8" rock. (3) Stockpile material at mine – this minimizes contamination of the ore from outside sources. (4) Transport ore to our Nephi processing facility. There are no plans to build any permanent structures or house equipment at the site. No chemical storage will occur at the site.

The property has been mined since the early 1960's. Initially by Azome Mining Company and now by the current owner AZOMITE Mineral Products, Inc. It is anticipated that mining will continue until the reserve runs out. The total reserve has been estimated at over 10M tons.
